WE ARE NOT THE SAME

We at APA are proud of our products and service. Our bows are renowned for functionality, performance, style and innovation. APA bows have gained international acclaim incorporating smooth draw cycles, virtually zero hand shock, accuracy and shootability. After great lengths, we've insured our bows are engineered to be user friendly and easy to maintain. We would like to take this opportunity to thank you, our loyal archers, for your support and feedback. We look forward to serving you and any new archers with quality, expertise and the best in archery.

KING **XR** COBRA

Equipped with APA's Rotating Draw Stop, the King Cobra^{XR} is the smoothest shooting Cobra to date. Ready to strike with extreme levels of kinetic energy, generating industry leading speeds up to 370 fps.

APA BOWS // FEATHERLIGHT DESIGN

MORE THAN JUST A BOW

APA TECHNOLOGY

Our passion for archery is our motivation to engineer industry leading technology and performance. Designed with functionality, APA bows are renowned for practical use in the field. This, along with our unique design, accuracy, shootability and world leading speeds, has created a new standard for compound bows. We encourage you to shoot an APA and see why we are NOT the same.

APA TOOL CENTRE

Broadhead Wrench
Carbide Sharpener
Cam Lock Pin
Nock Wrench

APA CARRYING HANDLE

APA's patented revolutionary handle that provides easy carrying and creates forward weight. Also increases stiffness in the riser acting as a support bridge, decreasing hand shock.

APA CAM LOCK

APA's innovative Cam Lock allows the average archer to replace strings or cables, make adjustments, install accessories and tune their bow without the need of a standard bow press.

APA TWIN FLEX 2 LIMBS

Until now traditional solid limbs stored energy only in the solid portion, leaving the forked end ridged. APA's TF limbs are engineered to allow the forked section to flex, distributing the load amongst two separate working areas, enabling the storage of more energy.

APA RISER FANG

APA's signature fang enables you to hang your bow directly onto any branch or limb without any additional equipment.

2019

MASS TRANSFER MODULE

APA's compact and innovative Mass Transfer Module (MTM) is engineered to control the front to back, side to side balance of your bow, minimizing hand torque. It maintains a sleek profile making it ideal for all hunting scenarios. *Quick easy one screw adjustment.*

CAMERA MOUNT

Capture your hunting experience from a first person view. Available on all 2019 bows, APA Camera Kit required.

ROTATING DRAW STOP

APA's Rotating Draw Stop enables a rock-solid back wall at any draw length or draw weight while still providing the highest level of performance. *A true game changer.*

ACCESSORIES

HHA OPTIMIZER TETRA TOOL FREE

An all new micro adjust windage system debuts on the Optimizer Tetra, making for faster set up than ever. Simply loosen the user friendly wing knob and incrementally slide the sight housing left or right to your approximate desired location. An additional half inch of travel with our micro drive then allows you to fine tune your setup one click at a time. The Tetra is ideal for bowhunters and 3D shooters

HHA OPTIMIZER LITE TOOL FREE

The silky smooth elevation arm pairs with the industry's most accurate sight tapes to deliver unmatched performance to hunters and 3D shooters alike. Simply sight in at 20 and 60 yards and you're ready to shoot from 20 to 80 yards in 5 yard increments. Tool free adjustments, fully protected fiber optics and solid construction make it the toughest, most dependable single pin adjustable sight available today.

TRUGLO TSX PRO MICRO 5 TOOL FREE

- Based on the original Award Winning TRUSITE™ XTREME Series.
- Unique stainless steel tube pin design for increased durability/brightness
- Adjustable for left and right handed shooters
- TRU TOUCH Soft-Feel technical coating
- Ultra-strong / Lightweight construction
