We at APA are proud of our products and services. Our bows and accessories are known for functionality, performance, style and innovation. APA bows have gained international acclaim to be the most field ready bows within the archery industry. Known to be fast, smooth, quiet, shock free, reliable and accurate. We have developed and incorporated exclusive features not found on any other brand of bow. Making our product unique, representing our slogan "We Are NOT The Same". After great lengths, we've insured our bows are engineered to be user friendly and easy to maintain. We would like to take this opportunity to thank our loyal archers, for their support and feedback. We look forward to serving you with quality products, expertise, and the best customer service in the archery industry.

**MORE
THAN
JUST A
BOW**

APA CARRYING HANDLE

APA's patented Carrying Handle provides easy transportation and maintains the balance point of the bow minimizing hand fatigue. Also increases stiffness in the riser acting as a support bridge, decreasing hand shock.

**APA
TECHNOLOGY**

Fueled by passion for archery, it has led us to engineer industry leading technology and performance. Our Unique designs, exclusive features and functionality is renowned for the most practical use in the field. With Industry leading speeds, accuracy, and shootability, it is time to find out why "We Are NOT The Same".

TOOL-FREE TUNNING TECH

FORGET THE BOW PRESS

APA CAM LOCK

APA's innovative Cam Lock allows the archer to replace the cables or string, make adjustments, install accessories and tune their bow without the need of a standard bow press. To use, simply apply a little pressure to the string or cables to slightly rotate the cam, insert the pin into one of the multiple cam lock holes located on the perimeter of the cam. No extra tools required, a stainless steel pin conveniently stored on the bow for easy access.

APA SHIFT TUNE

This new innovation allows you to effortlessly adjust the tune of your APA bow by shifting the cable yokes left or right. No tools required—no Allen wrench needed—just a simple, tool-free adjustment for a quick and easy setup." Comes standard on certain APA bow models.

APA MICRO TUNE

APA's patented adjustable Micro Tune Cable Guide allows for precise tuning / cam timing of your bow right at your fingertips. To make an adjustment simply loosen the red lock knob, then turn the black adjustment knob to either advance or slow down cam rotation, to achieve the desired result. No tools or bow press required.

TUNING AT YOUR FINGERTIPS.

**NO TOOLS
REQUIRED**

APA PRO CONNECT ACCESSORY MOUNTING POINT

Three unique mounting options are available (sold Separately) to optimize stability and customizability.

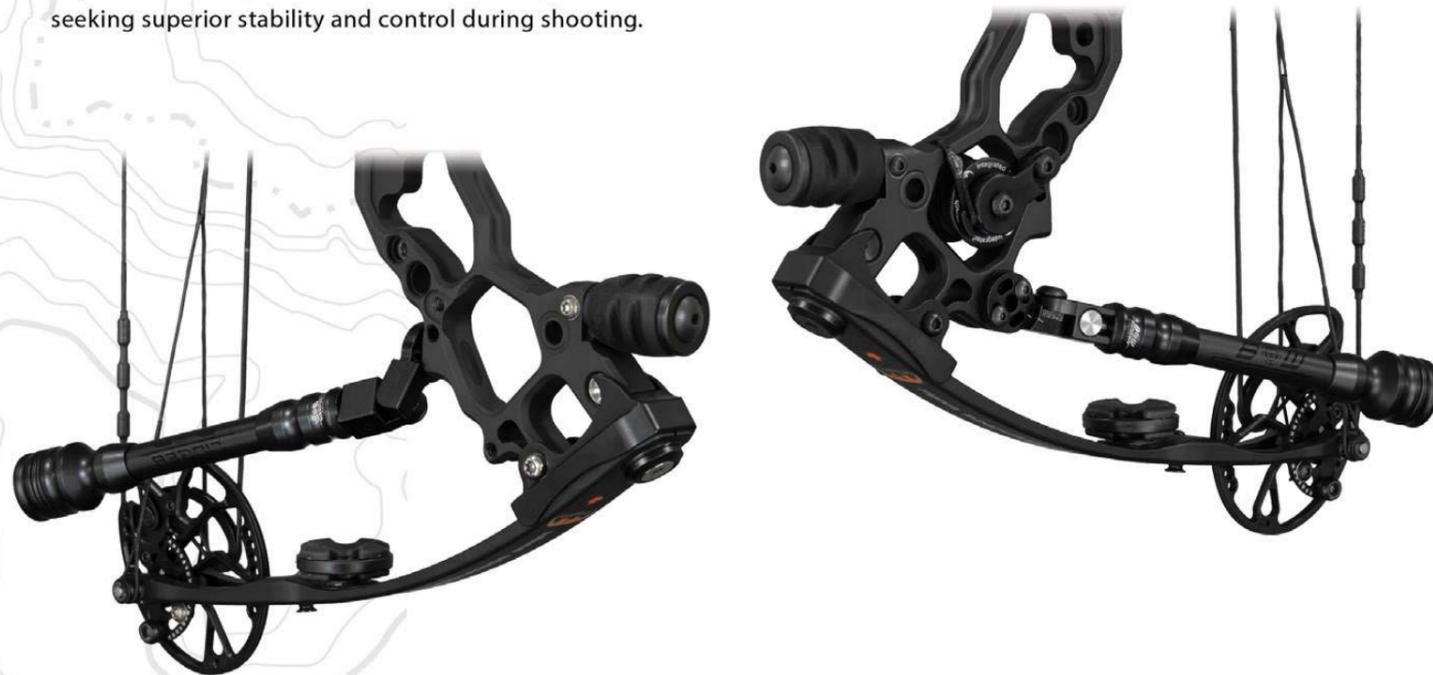

APA DISC WEIGHT DIRECT MOUNT

Allows for the direct attachment of 1oz increment disc weights, providing precise control over the bows balance. Improving stability, while maintaining an ultra slim profile. (will fit all APA bows / micro balancer)

APA REAR QD STABILIZER MOUNT

The Adjustable Rear Quick Detach (QD) Stabilizer Mount is designed to provide archers with a quick detachable and sleek option for rear stabilizer installation and removal. Featuring a streamlined design, this mount adds weight efficiently while maintaining a slender profile of the bow. By maintaining the bows center of gravity, the Adjustable Rear QD Stabilizer Mount offers a practical solution for archers seeking superior stability and control during shooting.

APA PRO CONNECT STABILITY CONTROL SYSTEM

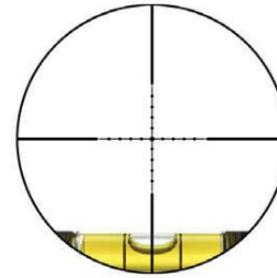

The Pro Connect Stability Control system is engineered to help archers achieve superior balance and accuracy in their shooting by addressing the bow's center of gravity. It does this by adding weight directly beneath the bow, allowing for optimal balance with less weight. Keeping the center of gravity right below the shooter's hand ensures the bow stays perfectly upright, which is key for improving long-range precision.

HIGH PERFORMANCE HUNTING BOW, WITH TARGET BOW STABILITY!

The Pro Connect Stability Control System (SCS) is available in an advanced configuration featuring three quick disconnect (QD) attachment points. This design enables archers to rapidly change stabilizer setups. SCS provides exceptional flexibility for tuning and adapting to various shooting solutions. Each QD attachment point allows for swift installation or removal of stabilizers without the need for tools, streamlines the process of adjusting balance and stability. In addition to its versatile mounting options, this system incorporates integrated vibration dampening technology. The **dampening components** are engineered to minimize sound and vibrations during the shot which significantly improves shooting comfort, contributing to greater accuracy. By reducing unwanted motion and feedback, archers can maintain steadier aim and achieve more consistent results, especially during extended shooting sessions.

S.C.S.

NO
ROPE
NO
PROBLEM

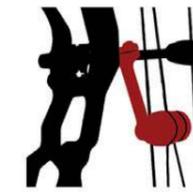

APA INTEGRATED WINCH (Optional)

No Rope, No Problem. Taking functionality to the next level, APA has come up with the ultimate backcountry accessory. The bow winch will allow you to lift your bow up to your treestand, by storing your rope in a nice compact spool integrated directly into the riser of your APA bow. Designed to save pack space and forgotten ropes. Weighing in at 2oz, and stores 25 feet of rope. Must be factory installed at time of bow purchase. Comes Standard in Black Color.

**BALANCE
YOUR
BOW**

APA MULTI-POSITION BALANCER (Optional)

APA's patented compact and innovative string stop mounted stabilizer / dampener is engineered to control the front to back, side to side balance of your bow, minimizing hand torque. It maintains a sleek profile for all scenarios. Quick easy one screw adjustment. Total weight 6 oz, with 3 removable 1oz disc weights. Comes standard in Black Color.

APA PRO CONNECT SIGHT

The Pro-Connect Sight mount offers a new flush sight retaining system, using a recessed track designed to accept many of the popular dovetail sights on the market today. This sight mounting system allows the sight to be moved in closer to the true center of the bow, providing the archer with a more balanced and sleek profile.

APA PRO CONNECT STABILIZER

The revolutionary Pro-Connect Stabilizer mount allows the user to quickly lock and remove various stabilizers on the market today. The new stabilizer mount is located on both front stabilizer mounting positions of the bow.

APA PRO CONNECT BOW SLING

The Pro-Connect Sling is a simple connect system to attach and detach a bow sling from the bow with ease, making it functional for all hunting conditions. This easy connect bow sling provides hunters with even more back country carrying power.

APA DRAWBOARD ADAPTER

Easily slide the adapter over the bow's grip, lock it into place, and you're ready to use the draw board with an APA bow. This Draw Board Adapter provides a simple way to synchronize your cam timing effortlessly. Compatible with APA bows (2020 and newer)

APA CENTER SHOT INDICATOR

APA's new Center Shot Indicator makes setting up a bow easier than ever. Simply remove your cam lock pin from the tool center, insert into the precision drilled hole on the riser above the arrow, adjust your arrow rest left or right to align your arrow with the laser etched indicator line and you are set.

APA NOCKPOINT ALIGNMENT ZONE

APA's Nock Point Alignment Zone allows you to correctly align the vertical positioning of the arrow's nock point. Simply look at the bow from a side view and adjust your arrow rest/ nock in parallel to the machined lines on the riser and your nock point is set, no bow square required.

APA Torque-Free Limb Anchor

APA's all new Torque-Free Limb Anchor gives you the perfect place to securely tie in your limb driven drop away rests. Placed in the perfect spot to eliminate side to side torque on your limb forks for increased accuracy.

APA ROTATING DRAW STOP

APA's Rotating Draw Stop enables a rock-solid back wall at any draw length or draw weight, while still providing the highest level of performance. A true game changer.

APA SLIM / LIGHT WEIGHT DESIGN

APA Bows are built with the hunter in mind. Industry leading technology designed to be the slimmest, most compact, lightest weight bows available. Along with its unmatched functionality and performance, sets the benchmark for the ultimate back country bow.

Comparison based on similar axle to axle bows:

- Slimmer in Width
- Shorter End to End
- Lighter in Physical Weight

APA CAMERA MOUNT

Capture your hunting experience from a first person view. All APA risers are drilled and tapped to accommodate your camera tripod mount for a direct mount. APA Camera Kit required sold separately.

APA INTEGRATED MOUNTING SYSTEM

A light, sleek and low profile way to mount your dovetail arrow rest.

ULTRA SLIM AND COMPACT

APA DIRECT MOUNT WRIST SLING

Allows the attachment of a safety wrist sling directly into the bow riser with the use of a set screw, no additional components required.

APA SNAKE LEGS

The engineering team has taken things to another level and innovated a way to put legs on a snake. While a typical bow pod mounts to your limb, it does not allow you to shoot with it on, as it will create noise and affect the shot. The APA Snake Legs secures to the bow pocket for a better fit while also allowing you to shoot your bow without removing since it does not interfere with bow operation. Pressed for time? Grab and shoot with ease.

APA TWIN FLEX LIMBS

Until now, traditional solid limbs stored energy only in the solid portion, leaving the forked end rigid. APA's TF limbs are engineered to allow the forked section to flex, distributing the load amongst two separate working areas, enabling the storage of more energy.

APA RISER FANG

APA's signature fang enables you to hang your bow directly onto any branch or limb without any additional equipment.

APA TOOL CENTRE

Cam Lock Pin

Broadhead Wrench

Nock Wrench

Carbide Sharpener

APA EXOGRIP

A new advanced exoskeleton grip meticulously crafted for increased rigidity, reduced weight and optimal balance, providing enhanced comfort and stability. Featuring our integrated finger reference groove, this design promotes improved accuracy and greater shot consistency.

The **Black Mamba Pro 6** is a top choice for hunters seeking a **high performance hunting bow with target bow accuracy**, when equipped with APA's revolutionary Pro Connect Stability Control System (SCS). Featuring Toolless tuning technology allowing easy tuning without the use of a bow press or even an Allen wrench. This 6 1/16" brace height bow weighs in at a 3.9lbs and has an impressive IBO speed rating of 357 fps! APA's compound bows are largely known for their infield function and technical advancement, now incorporating 4 additional game changing features referred to as APA's Pro-Connect Technology. The Black Mamba Pro 6 is extremely quiet, light, smooth, efficient, and is the most technically advanced bow APA has ever built. APA's cutting-edge technology charts the Black Mamba Pro 6 as the ultimate compound bow for the serious archer.

APA PRO CONNECT TECHNOLOGY

Patents Pending

APA PRO CONNECT ACCESSORY MOUNTING POINT

The Pro-Connect Stability Control System (S.C.S.) is engineered to help archers achieve superior balance and accuracy in their shooting by addressing the bow's center of gravity. By maintaining the center of gravity directly below the base of the shooter's hand ensures the bow remains plumb, which is crucial for improving long-range accuracy.

APA PRO CONNECT SIGHT MOUNT

The Pro-Connect Sight mount offers a new flush sight retaining system, using a recessed track designed to accept many of the popular dovetail sights on the market today. This sight mounting system allows the sight to be moved in closer to the true center of the bow, providing the archer with a more balanced and sleek profile.

APA PRO CONNECT STABILIZER MOUNT

The revolutionary Pro-Connect Stabilizer mount allows the user to quickly lock and remove various stabilizers on the market today. The new stabilizer mount is located on both front stabilizer mounting positions of the bow.

APA PRO CONNECT BOW SLING MOUNT

The Pro-Connect Sling is an easy connect system to attach and detach a bow sling from the bow with ease, making it functional for all hunting conditions. This easy connect bow sling provides hunters with even more back country carrying power.

The APA King Cobra Dangerous Game X is unlike any other with its blistering arrow speed of 363fps IBO. The King Cobra DGX is loaded with APA's exclusive features for the highest level of functionality and tune-ability. This platform is lighter, stronger, more stable, and is the best-balanced King Cobra yet. Experience the kinetic energy with a shock free feel, a more forgiving brace height and increased accuracy. This makes the King Cobra DGX ideal for the short draw or the archer seeking maximum power. With the ability to reach draw weights up to 100 lbs this will be the most powerful stock bow ever built producing 150 KE @ 100 lbs of draw weight. This bow is ready to take on any challenge put in front of it!

APA Archery has ascended to new heights with the Summit. Built on APA's Pro Lite riser, this bow is packed with the highest level of innovation including APA's Pro-Connect Sling, Pro-Connect Stabilizer and Shift Tune Technology. This Shift Tune Technology will allow the archer to tune their bow effortlessly with no tools required. The APA Summit will be sure to elevate your game. Weighing in at a mere 3.4 lbs, producing 340 fps IBO, with a forgiving 7 3/8" brace height, the Summit is one of the most advanced high-performance bows to be revealed. Built for maneuverability and in-field function, the APA Summit positions itself as the frontrunner. With its compact 28" axle to axle platform, even the best eyes in the field will have a hard time finding you. If you are looking for a bow to help you climb to the highest level, you can count on the APA Summit.

The Black Mamba X33 is engineered for an exceptionally smooth, quiet, and forgiving shooting experience. With a 33" axle-to-axle length and a generous 6 5/16" brace height, it delivers remarkable stability and comfort, making it a true pleasure to shoot. Combining impressive speed with a lightweight design, the Black Mamba X33 is also an ideal choice for archers with longer draw lengths, ensuring optimal performance for a wide range of users. The Black Mamba X33 is also available in custom draw weight builds of up to 100lbs!

The Black Mamba 29 is an ultra-compact, lightweight, high-performance bow designed to dominate its class and become a fan favorite. Packed with APA's exclusive features, this bow is the ultimate tool for serious backcountry hunters. At just 3.7 lbs, the Black Mamba 29 is impressively light, yet powerful, delivering a blistering 355 fps IBO speed. With a forgiving 6 1/4" brace height, it achieves the perfect balance between speed and accuracy, making it one of the most forgiving bows in the compact category. Whether you're navigating rugged terrain or shooting from the stand, the Black Mamba 29 is built for the archer who demands a compact platform without compromising performance, reliability, and precision—making it the ideal choice for your next adventure.

The Serpent R1 is a compact, lightweight, and highly adjustable bow that combines performance with versatility. At just 3.3 lbs, it's easy to handle without sacrificing power, delivering a respectable IBO speed of 320 fps. The 7 1/2" brace height offers increased forgiveness, making it easier to shoot accurately and consistently—whether you're a seasoned archer or just starting out. Packed with APA's exclusive technology, the Serpent R1 stands out for its quiet, smooth and reliable platform. It's built for archers who desire a bow that can grow with their skills, offering smooth adjustability in draw length and weight to match your unique preferences. The Serpent R1 delivers.

The Python redefines performance with unmatched accuracy, rock-solid stability, and exceptional tunability. Built to endure thousands of shot cycles, it delivers impeccable consistency shot after shot. With a forgiving 7" brace height, a 37-inch axle-to-axle length, and an impressive 340 fps IBO rating, the Python is designed to help you hit the X-ring every time. Engineered for the most demanding archers, this bow is packed with APA's exclusive technology, ensuring you won't find a more user-friendly or tunable bow on the market. Whether you're a seasoned pro or an avid enthusiast, the Python is ready to perform at the highest level, giving you the edge you need when it counts most.

Any Fletch Orientation

Twister 360 in action

APA TWISTER 360

Left / Right Hand Specific

- All metal construction machined from aircraft grade aluminum, brass and stainless steel
- Complete with noise reducing fleece
- Micro adjustable left and right
- APA's Forward Launch Position
- Does not affect cam timing
- Whisper quiet
- Side Load Capable
- Any Fletch Configuration
- Can be used with 3 or 4 Fletching
- Full Containment
- Easy Set up

APA SAFARI LITE

Left / Right Hand Compatible

APA's Safari Lite is a lightweight, rugged, reliable, all metal construction, full containment rest. It automatically sets itself to the correct angle for optimum fletching clearance. Fleece provides whisper quiet performance. No moving parts.

OPTIMUM CLEARANCE

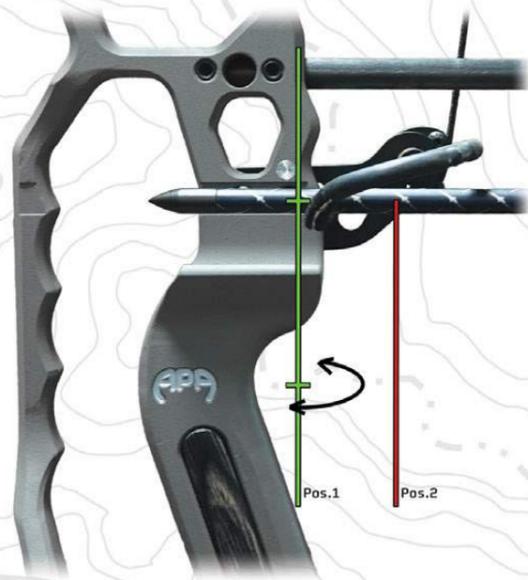

APA SAFARI TRADITIONAL

Left / Right Hand Specific

APA's Safari Traditional automatically sets itself to the correct angle for optimum fletching clearance. Fully adjustable to get the most accuracy from a finger shot bow. An excellent safe choice for the younger archer. No moving parts.

APA RESTS
TESTED. TRUSTED.
TOUGH

Lets Talk Accuracy

Pos 1.

- APA's exclusive Forward Launch Position
- Longer Arrow support throughout the shot
- Positions arrow directly above the grip pivot point
- Minimized Bow/Hand Torque
- End Result - Increased Accuracy

Pos 2.

- Disadvantages of other Rests
- Other arrow rests support the arrow behind the grip pivot point
- End Result - Decreased Accuracy

HHA NYTRIX TOOL FREE

Introducing the NYTRIX – the most advanced site system yet. Built with direct feedback from customers, these sights redefine customization and efficiency, giving you complete control over your setup. Want to shoot a 2-pin for whitetails but a 3-pin for elk? You no longer need two sights; the NYTRIX is your answer. Easily swap between indicators, scopes, and frames to customize your setup.

APEX COVERT 4pin

COVERT Four-Pin takes versatility to a new level, combining the benefits of a long-range sliding single-pin sight with those of a traditional multi-pin sight. Locked, the COVERT™ can be used like any familiar multi-pin sight. Unlocked, the sight can be dialed in for precise long-range accuracy.

APEX COVERT 1pin

The Apex Covert single pin sight provides precision without distraction. With a rear facing easy to see yardage and 120 pre marked yardage tapes, micro adjustable and ultra smooth easy one hand adjustment. The Apex Covert guarantees accuracy.

Thank you to our prostaff that continue to strive for excellence and congratulations on all of your achievements. We would also like to thank everyone that has supported APA Archery and helped us to achieve worldwide recognition.

Real Results - Real People

"I've spent over 50 years bowhunting and have been a dealer for every major bow brand in North America. I've never shot another brand since. APA quickly became our main draw thanks to their incredible innovations and outstanding bows. APA bows practically shoot themselves if you point them right! All I can say is—just amazing and outstanding work, APA." - Niel

"Nobody does what you do to make a high performance hunting bow to be tuned up to go hunt in the field without a bow press" - James

"The customer service is great. The fit and finish of this bow is amazing. Great bow with lots of speed especially for someone with a shorter draw cycle. APA knocked it out of the park!" - Brett

"These bows flat out shoot" - Justin

"love my APA bow. Very funtional and fast" - Claude

"This hunt was challenging, humbling, and unforgettable—and your craftsmanship played a major part in making it possible. Thank you for building a bow I can trust in the most demanding conditions. I'm proud to carry APA into the high country and look forward to many more adventures with it" - Rudy

"nicely done, always innovating" - Mark

"Customer service is phenominal !!!!! The nicest people to work with" - Dennis

"Absolutely amazing. This bow is fast, accurate and fun. My speed matches that of bows with 15 pounds more draw weight. Apa customer service is amazing!!" - Joseph

"I've been shooting an APA bow for about 12 years. They have given the best service and tech support of any company in any business I have ever dealt with." - Jordan

"Fast response! Great customer service. Great company!" - Donald

"I have said it time and time again. The best bows ever in my 41 years of bow hunting. If your not shooting an APA bow you are really missing out period!" - Rudy

"These APA Bows, they are something unique. Smooth, Fast, Thin, Light, Quiet. You can definitely tell you got something different in your hands when you pick one up. Great customer service, lots of unique built in features" - Steven

"I suppose i could get another one for the collection" - Brad

"This is thinking outside the box" - Cyrus

"Fantastic Feeling bow. You really don't realize how big and clunkymost new split limb bows feel until you get one of these in your hands. Such a sleek and nimble little bow with the single limbs. This thing would be a joy to carry in the bush" - Matt

"Love these bows! ive put up some insanelly high scores with these bows. You can ask yourself.. does the bow really make that much of a difference? Absolutely!!" - Brian

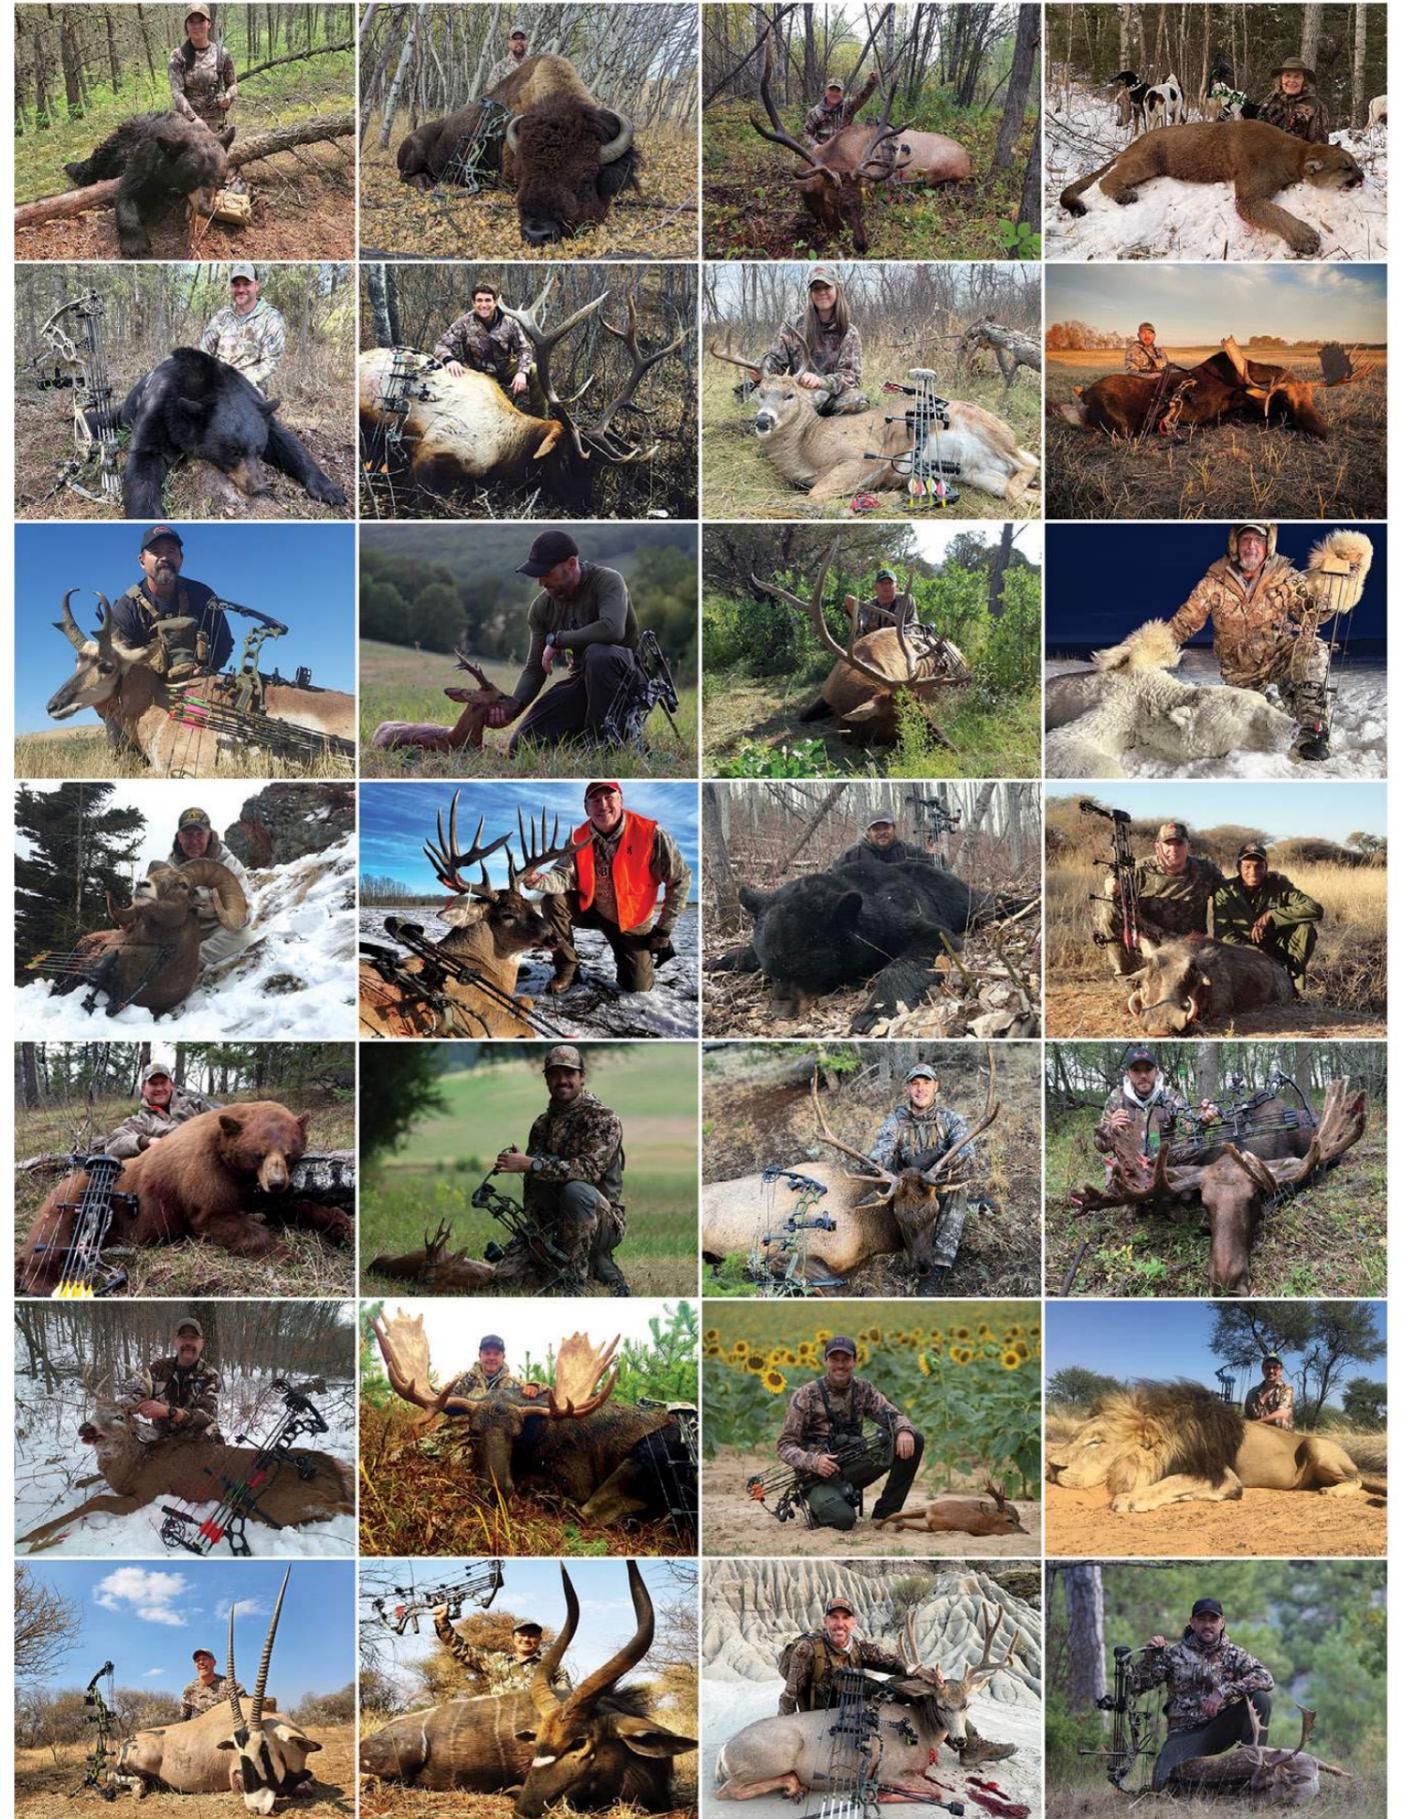

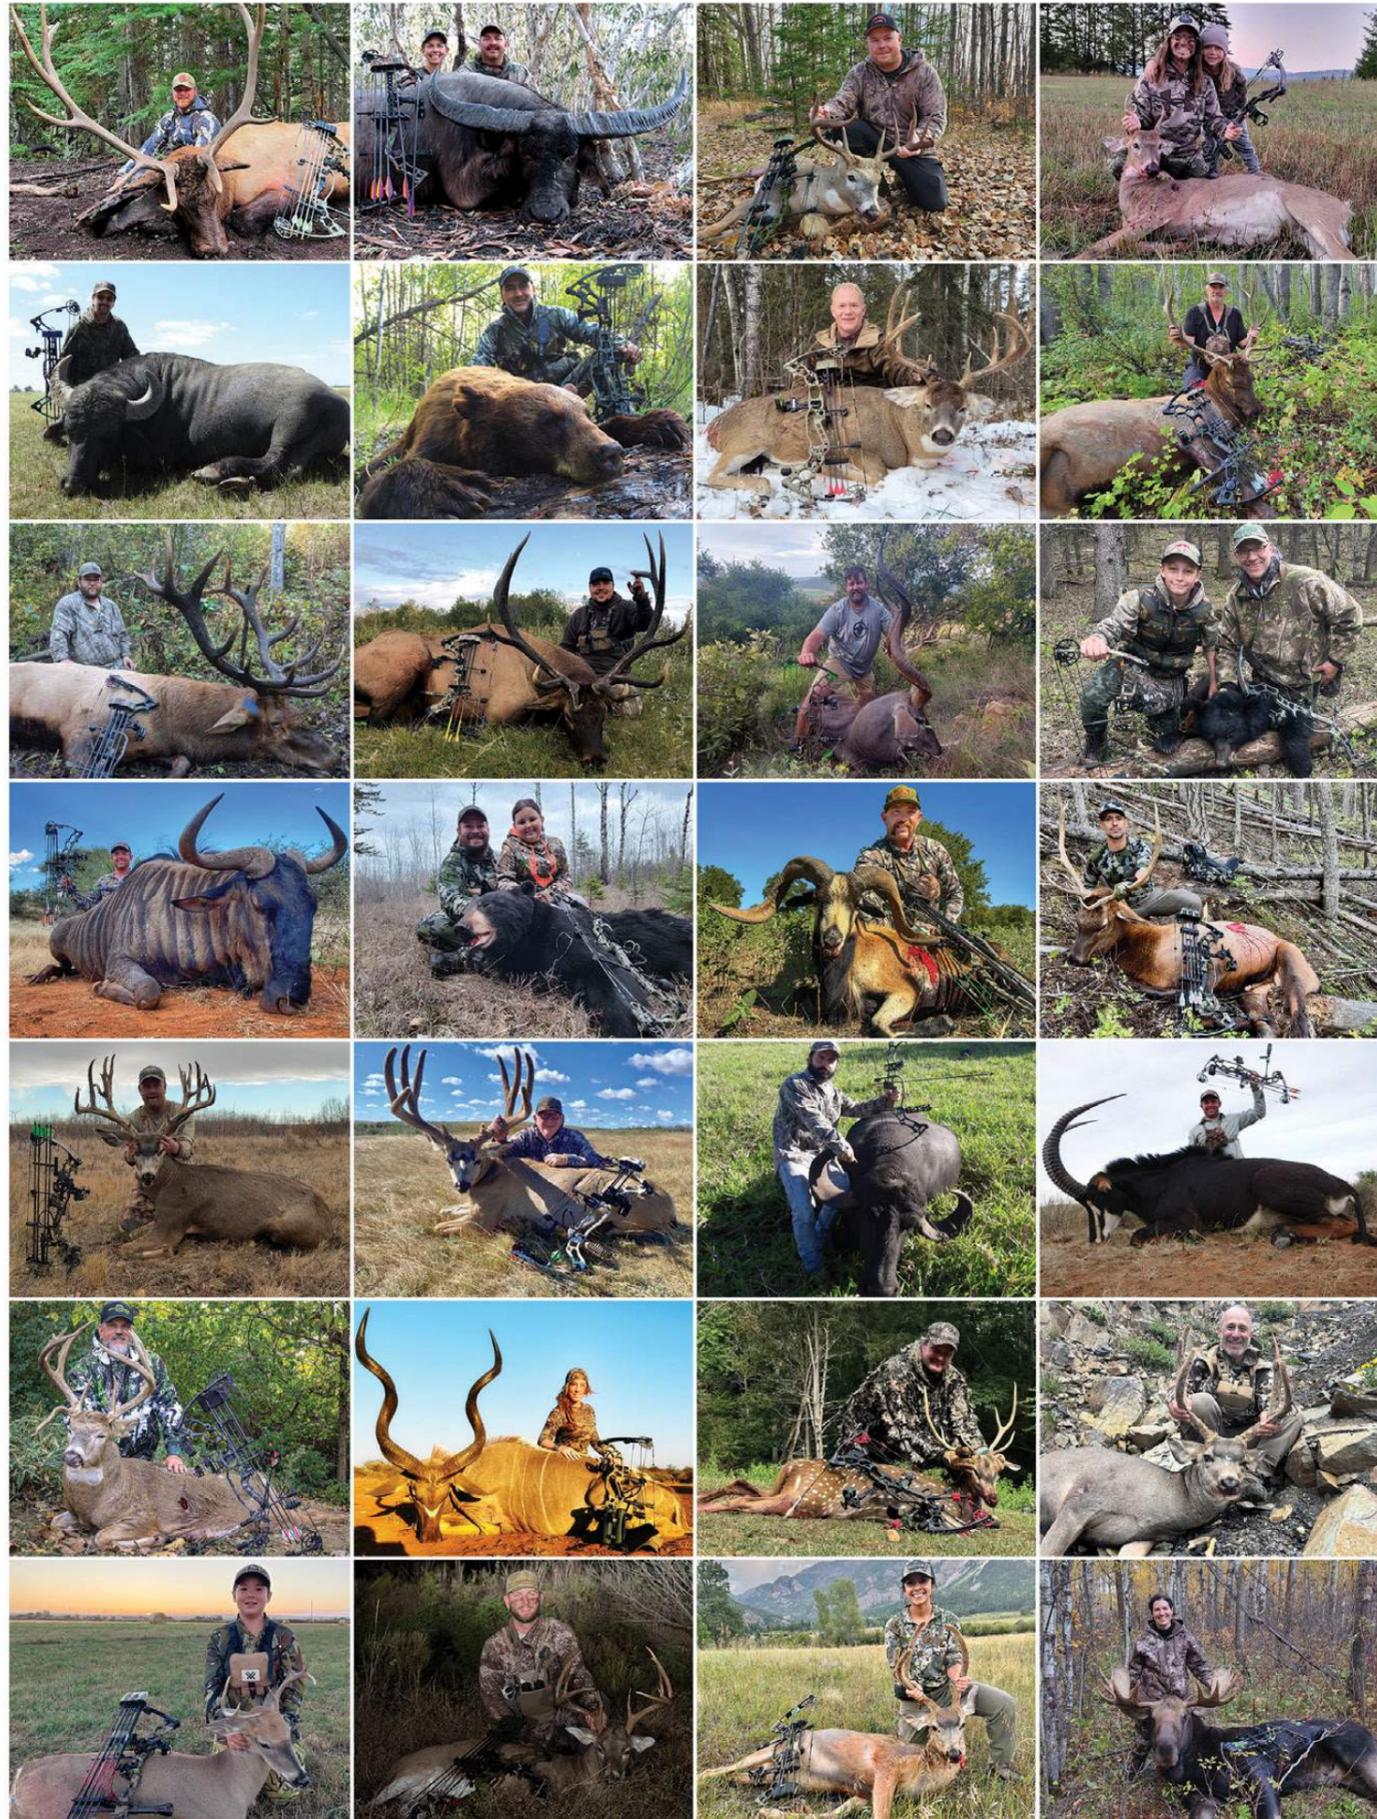

"Nothing shoots better and more accurate than these bows. Stable, very forgiving and super smooth. You can draw high poundage and feel like its less" - Allen

"Awesome amazing technology" - Mark

"Ordered the Black Mamba Pro last year and has been amazing I've tried other bows and the Black Mamba Pro has been perfect for me. I don't think I'll ever switch to another bow" - J.J.

"Really appreciate the time you're taking with the correspondence. This type of customer service is awesome. I've been bow hunting for over 30 years, had a lot of bows and brands. I am extremely impressed with the design that appears to be by someone or several that actually hunt trying to build a better product and not just making a dollar and that means a lot. Thank you." - Carl

"Best bow bar none!! No other bow can match it" - Richard

APA 2026

FINISH OPTIONS

1 SKRE SUMMIT
