We at APA are proud of our products and services. Our bows and accessories are known for functionality, performance, style and innovation. APA bows have gained international acclaim to be the most field ready bows within the archery industry. Known to be fast, smooth, quiet, shock free, reliable and accurate. We have developed and incorporated exclusive features not found on any other brand of bow. Making our product unique, representing our slogan "We Are NOT The Same". After great lengths, we've insured our bows are engineered to be user friendly and easy to maintain. We would like to take this opportunity to thank our loyal archers, for their support and feedback. We look forward to serving you with quality products, expertise, and the best customer service in the archery industry.

RISER**

MORE THAN JUST A BOW

APA CARRYING HANDLE

APA's patented Carrying Handle provides easy transportation and maintains the balance point of the bow minimizing hand fatigue. Also increases stiffness in the riser acting as a support bridge, decreasing hand shock.

APA TECHNOLOGY

Fueled by passion for archery, it has led us to engineer industry leading technology and performance. Our Unique designs, exclusive features and functionality are renowned for the most practical use in the field. With Industry leading speeds, accuracy, and shoot ability, it is time to find out why "We Are NOT The Same".

FORGET THE BOW PRESS

APA CAM LOCK

APA's innovative Cam Lock allows the archer to replace the cables or string, make adjustments, install accessories and tune their bow without the need of a standard bow press. To use, simply apply a little pressure to the string or cables to slightly rotate the cam, insert the pin into one of the multiple cam lock holes located on the perimeter of the cam. No extra tools required, a stainless steel pin conveniently stored on the bow for easy access.

APA PRO CONNECT SIGHT

The Pro-Connect Sight mount offers a new flush sight retaining system, using a recessed track designed to accept many of the popular dovetail sights on the market today. This sight mounting system allows the sight to be moved in closer to the true center of the bow, providing the archer with a more balanced and sleek profile.

APA MICRO TUNE

APA's patented adjustable Micro Tune Cable Guide allows for precise tuning / cam timing of your bow right at your fingertips. To make an adjustment simply loosen the red lock knob, then turn the black adjustment knob to either advance or slow down cam rotation, to achieve the desired result. No tools or bow press required.

APA PRO CONNECT STABILIZER

The revolutionary Pro-Connect Stabilizer mount allows the user to quickly lock and remove various stabilizers on the market today. The new stabilizer mount is located on both front stabilizer mounting positions of the bow.

NO TOOLS
REQUIRED

TUNING AT YOUR
FINGERTIPS.

APA BOW WINCH

No Rope, No Problem. Taking functionality to the next level, APA has come up with the ultimate backcountry accessory. We have designed this product so versatile it can attach to your bow in 2 separate ways, while operating flawlessly in all applications. Designed to save pack space and forgotten ropes, the Bow Winch will lift your bow up to your tree stand and stores easily in a nice compact spool in a stabilizer, or integrated directly into the riser of your APA bow.

Comes Standard in Black Color.

APA INTEGRATED WINCH

Mounted integrally inside compatible APA bow models for optimal performance. Easy locking system allowing you to hoist your bow in the field, weighing in at 2oz. Must be factory installed at time of bow purchase.

BALANCE YOUR BOW

APA MULTI-POSITION BALANCER

APA's patented compact and innovative string stop mounted stabilizer / dampener is engineered to control the front to back, side to side balance of your bow, minimizing hand torque. It maintains a sleek profile for all scenarios. Quick easy one screw adjustment. Comes standard in Black Color.

NO
ROPE
NO
PROBLEM

TUNING TECHNOLOGY

APA STABILIZER WINCH

Can be used on any make or model bow, simply attaching like any normal stabilizer. Raise or lower your bow with the simple, easy to use locking system. Weighing at 4oz.

APA INTEGRATE REST MOUNT

A light and sleek and low profile way to mount your dovetail arrow rest.

APA ROTATING DRAW STOP

APA's Rotating Draw Stop enables a rock-solid back wall at any draw length or draw weight, while still providing the highest level of performance. A true game changer.

APA CENTER SHOT INDICATOR

APA's new Center Shot Indicator makes setting up a bow easier than ever. Simply remove your cam lock pin from the tool center, insert into the precision drilled hole on the riser above the arrow, adjust your arrow rest left or right to align your arrow with the laser etched indicator line and you are set.

APA NOCKPOINT ALIGNMENT ZONE

APA's Nock Point Alignment Zone allows you to correctly align the vertical positioning of the arrow's nock point. Simply look at the bow from a side view and adjust your arrow rest/ nock in parallel to the machined lines on the riser and your nock point is set, no bow square required.

APA PRO CONNECT BOW SLING

The Pro-Connect Sling is an easy connect system to attach and detach a bow sling from the bow with ease, making it functional for all hunting conditions. This easy connect bow sling provides hunters with even more back country carrying power.

ULTRA SLIM AND COMPACT

APA SLIM / LIGHT WEIGHT DESIGN

APA Bows are built with the hunter in mind. Industry leading technology designed to be the slimmest, most compact, lightest weight bows available. Along with its unmatched functionality and performance, sets the benchmark for the ultimate back country bow.

Profile comparison based on similar axle to axle bows:

- Slimmer in Width
- Shorter End to End
- Lighter in Physical Weight

APA STABILITY CONTROL SYSTEM

APA's Stability Control System allows you to customize the feel and balance of your bow. Using a 1/4-20 threaded hole in the riser allows you to add 1, 2, or 4 oz weights near the pocket on either left or right side on the top or bottom of the bow riser. Improving stability and allowing the archer a more precise hold when aiming, while keeping APA's slim profile maintaining the slimmest bow on the market.

APA Torque-Free Limb Anchor

APA's all new Torque-Free Limb Anchor gives you the perfect place to securely tie in your limb driven drop away rests. Placed in the perfect spot to eliminate side to side torque on your limb forks for increased accuracy.

APA RISER FANG

APA's signature fang enables you to hang your bow directly onto any branch or limb without any additional equipment.

APA TWIN FLEX LIMBS

Until now traditional solid limbs stored energy only in the solid portion, leaving the forked end ridged. APA's TF limbs are engineered to allow the forked section to flex, distributing the load amongst two separate working areas, enabling the storage of more energy.

Cam Lock Pin

Broadhead Wrench

Nock Wrench

Carbide Sharpener

APA TOOL CENTRE

Broadhead Wrench
Carbide Sharpener
Cam Lock Pin
Nock Wrench

APA SNAKE LEGS

The engineering team has taken things to another level and innovated a way to put legs on a snake. While a typical bow pod mounts to your limb, this does not allow you to shoot with it on, as it will create noise and affect the shot. The APA Snake Legs secures to the bow pocket for a better fit while also allowing you to shoot your bow without removing it as it does not interfere with limb movement. Pressed for time? Grab and shoot without worry of the snake legs.

APA DIRECT MOUNT WRIST SLING

Allows the attachment of a safety wrist sling directly into the bow riser with the use of a set screw, no additional components required.

APA CAMERA MOUNT

Capture your hunting experience from a first person view. All APA risers are drilled and tap to accommodate your camera tripod mount for a direct mount. APA Camera Kit required sold separately.

IBO Up to	360 FPS
Axle To Axle	31 1/2"
Brace Height	6 1/2"
Physical Weight	3.9 lbs
Draw Weight	40, 50, 60, 70

Any Fletch Orientation

Twister 360 in action

APA TWISTER 360

Left / Right Hand Specific

- All metal construction machined from aircraft grade aluminum, brass and stainless steel
- Complete with noise reducing fleece
- Micro adjustable left and right
- APA's Forward Launch Position
- Does not affect cam timing
- Whisper quiet
- Side Load Capable
- Any Fletch Configuration
- Can be used with 3 or 4 Fletching
- Full Containment
- Easy Set up

APA SAFARI LITE

Left / Right Hand Compatible

APA's Safari Lite is a lightweight, rugged, reliable, all metal construction, full containment rest. It automatically sets itself to the correct angle for optimum fletching clearance. Fleece provides whisper quiet performance. No moving parts.

APA SAFARI TRADITIONAL

Left / Right Hand Specific

APA's Safari Traditional automatically sets itself to the correct angle for optimum fletching clearance. Fully adjustable to get the most accuracy from a finger shot bow. An excellent safe choice for the younger archer. No moving parts.

Lets Talk Accuracy

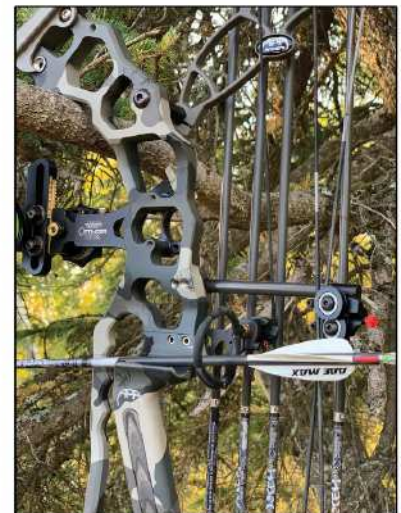

Pos 1.

- APA Twister 360 shown in position 1 illustrates
- APA's exclusive Forward Launch Position
- Longer Arrow support throughout the shot
- Positions arrow directly above the grip pivot point
- Minimized Bow/Hand Torque
- End Result - Increased Accuracy

Pos 2.

- Disadvantages of other Rests
- Other arrow rests support the arrow behind the grip pivot point
- End Result - Decreased Accuracy

// ACCESSORIES

HHA TETRA / TETRA RYZ TOOL FREE

Over two decades of technology come together to provide one of the most versatile, lightweight and rugged sights available. The Tetra delivers a silky smooth 2.1" of travel on your choice of a fixed frame or dovetail bar. To the yard accuracy with their patented R.D.S. sight tapes and precision windage adjustment provide deadly accuracy in the field and on the range. The quiver friendly, wheel forward design makes these sights ideal for bowhunters and 3D shooters alike. With 2nd and 3rd axis adjustment and a full line of accessories, the Tetra is destined to take over as the new #1 adjustable sight on the market today.

APEX GEAR MAGNITUDE

The Apex Magnitude multi-pin Sight is designed to be rugged and overbuilt, perfect for backcountry adventures that can be hell on gear. Micro adjustable windage and elevation controls, a large 2 in. aperture diameter, with a new bracket design for increased strength and a modern look to match the latest bow designs.

TRUGLO VEROS

The VEROS takes bow hunting and 3D shooting to the next level with benefits and features that hit well above its pricepoint. Constructed from lightweight aircraft aluminum and finished with TRU-TOUCH™ soft-feel technical coating, the VEROS is ready for the harshest environments.
