# APA ARCHERY

# 2020

# WE ARE NOT THE SAME

We at APA are proud of our products and service. Our bows are renowned for functionality, performance, style and innovation. APA bows have gained international acclaim incorporating smooth draw cycles, virtually zero hand shock, accuracy and shootability. After great lengths, we've insured our bows are engineered to be user friendly and easy to maintain. We would like to take this opportunity to thank you, our loyal archers, for your support and feedback. We look forward to serving you and any new archers with quality, expertise and the best in archery.

APA 2020

NEW 2020

# BLACK MAMBA RISER

## INSPIRATION

The inspiration for APA's newly engineered 2020 Black Mamba Riser was derived from the Black Mamba snake and it's coffin-shaped head. The design for this riser allows for better weight distribution and balance of the bow, providing a lighter, more rigid structure for a superior level of performance.

## RISER UPGRADES AND FEATURES

- *The new Black Mamba Riser is now equipped with a larger fang allowing it to hang on a larger branch in the field.*
- *Dual position sight mounts to accommodate more sight options.*
- *The new Black Mamba Riser is now Top position MTM mount for allowing it to orbit around a short carbon rod to achieve the perfect balance and reduce vibration.*
- *Dual burger buttonholes allowing you to securely bolt your arrow rest on your bow.*
- *Interchangeable grip allowing different wrist angle positions.*

APA ARCHERY

- *Machine groove in front of grip serves as a reference point for your fingers, allowing consistent bow hand positioning.*
- *Our weight distribution system (WDS) located at the top and bottom of the riser accommodates disc weights to achieve the ultimate balance for a rock solid hold on target.*

*Visit www.apaarchery.com for videos further describing the new Black Mamba Riser.*

# MORE THAN JUST A BOW

## APA TECHNOLOGY

Our passion for archery is our motivation to engineer industry leading technology and performance. Designed with functionality, APA bows are renowned for practical use in the field. This, along with our unique design, accuracy, shootability and world leading speeds, has created a new standard for compound bows. We encourage you to shoot an APA and see why we are NOT the same.

### APA TOOL CENTRE

*Broadhead Wrench*
*Carbide Sharpener*
*Cam Lock Pin*
*Nock Wrench*

### APA CARRYING HANDLE

*APA's patented carrying handle provides easy transportation and maintains the balance point of the bow minimizing hand fatigue. Also increases stiffness in the riser acting as a support bridge, decreasing hand shock.*

2020

NEW MICRO TUNE

### APA MICRO TUNE

*APA's new patented adjustable Micro Tune Cable Guide allows for precise tuning / cam timing of your bow right at your fingertips. No tools or bow press required.*

**NO TOOLS REQUIRED**

*TUNING AT YOUR FINGERTIPS.*

### APA CAM LOCK

*APA's innovative Cam Lock allows the average archer to replace strings or cables, make adjustments, install accessories and tune their bow without the need of a standard bow press. No Tools required.*

ADS

### ROTATING DRAW STOP

*APA's Rotating Draw Stop enables a rock-solid back wall at any draw length or draw weight while still providing the highest level of performance. A true game changer.*

### MASS TRANSFER MODULE

*APA's compact and innovative string stop mounted Mass Transfer Module is engineered to control the front to back, side to side balance of your bow, minimizing hand torque. It maintains a sleek profile for all scenarios. Quick easy one screw adjustment.*

### APA RISER FANG

*APA's signature fang enables you to hang your bow directly onto any branch or limb without any additional equipment.*

### APA TWIN FLEX 2 LIMBS

*Until now traditional solid limbs stored energy only in the solid portion, leaving the forked end ridged. APA's TF limbs are engineered to allow the forked section to flex, distributing the load amongst two separate working areas, enabling the storage of more energy.*

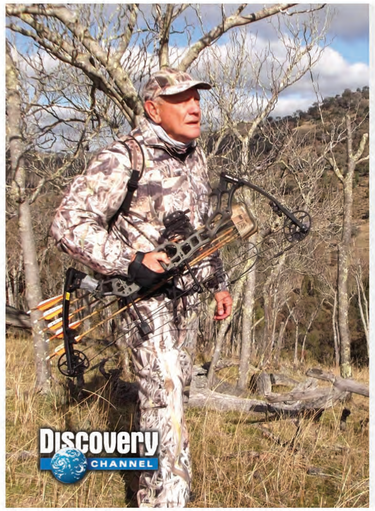
ST SOFT TOUCH



"I have been bowhunting for over 35 years and have often featured bowhunting feral boars in Australia for my Wildlife Man films. I can honestly say that I have never shot a finer shooting, more accurate bow than the APA Mamba. So smooth, so fast and so easy to tune."

**– David Ireland**
**(The Wildlife Man)**
